Cash Receipting and Deposit Policy

Adopted April 2, 2025

Cash Receipts at Separate Individual Locations

1. All funds received by the Treasurer, without an accompanying invoice, are entered into the accounting system by the Clerk at the approximate time of the transaction or if the transaction occurs at a location without access to the accounting system, the funds will be logged into a receipt book, or equivalent with enough detail to determine where/who the funds came from, the purpose for receiving the funds, the method of payment; cash, check, Venmo, credit card etc., and designate the appropriate account. Manual receipts should have three copies; Customer copy, a Treasurer copy and a location copy.
2. At the end of each event, the Treasurer will place cash, checks, Venmo and credit card receipts received along in a deposit bag and place in a secure (locked) place for delivery in the next two business days.
3. Void/adjusted transactions. If a transaction needs to be voided or adjusted it should be done by the Clerk or a board member (who does not receive cash), including an explanation explaining the circumstances causing the adjustment.. The Clerk should ensure the accounting generates a report of all adjusted/voided transactions to facilitate monitoring of this process.
4. Every effort should be made to ensure cash is not on hand at any location overnight. If a location has a large transaction or series of transactions leaving cash on hand over $1,000, the deposit should be made within 24 hours.
5. When deposits are received by the Treasurer, the person delivering the funds will watch as it is counted, receive a receipt detailing the amount, date of receipt and the signature of the Treasurer who took custody of the funds. This receipt will be kept with the receipt records. Any discrepancy in the funds being deposited and the supporting documentation should occur when custody of the funds changes.
6. The Treasurer either enters the deposit into the accounting system, or works with the Clerk to do so and then the Treasurer takes funds to the bank.
7. Mail will be opened in the presence of two or more persons and any correspondence containing payments will be evaluated by the Clerk and Treasurer.

Deposits with Treasurer

1. The Treasurer will receive PVLAD funds, count the funds, compare the amount received to the supporting documentation provided (invoice or receipt) and give a receipt to the person who turned over the funds with the amount received, date and that person's name and signature.
2. The Treasurer enters the information from the deposit directly into the Accounting system, or works with the Clerk to do so
3. The Treasurer will compile all cash and checks received, match the total to the total receipts in the accounting system, and create a deposit slip (deposit information should be sufficiently detailed to allow a reviewer to trace individual transactions into the deposit and verify that the funds were received by the bank.
4. Copies of deposit slips are maintained and used to reconcile bank statements to the accounting records.
