Surplus Property Disposal

Adopted March 5, 2025

PVFD will make every reasonable effort to obtain best value for the asset, to include but not limited to posting on community websites a notice of the asset to be sold, contacting other fire service agencies, or contracting with an auction service

Procedure

The Fire Chief identifies an item to be declared surplus and presents a description and estimated fair market value to the PVSSD. With the PVSSD board approval, the item may be relinquished in the following methods:

- Sell or transfer to another governmental agency.
- Auction the item on eBay or via live auction.
- Sell the item through a sealed-bid process.
- Trade the item in for new replacement equipment.
- Properly discard the item if the item is broken, unusable, and/or hazardous.

Disposal of assets by PVFD will follow all state and local laws for the recording and accounting of transactions, registration, and payment of any associated fees, taxes, commissions, etc.

Assets that are disposed of must be noted in the District's asset tracking system and any gain/loss acknowledged in the accounting records.

Funds received by the PVFD from the sale of any asset shall be recorded on the monthly financial records under Miscellaneous Income. Use of these funds by PVFD will be at the discretion of the PVSSD in consultation with PVFD leadership.
