Pine Valley Special Services District ("PVSSD")

Meeting Minutes - PENDING

Pine Valley Fire Station, 680 East Main Street, Conference Room

Wednesday, October 14, 2026

Board Members:	Bob Dalley, Chairman Emily Neilson, Vice-Chair Allen Cannon Mark Owens Steve Shakespeare
PVSSD Assistants:	Rick Peetz, Clerk Teri Forbes, Treasurer
Fire Chief:	Robert Hardy
Others:	Rob Nodine Frank Davie Kendall Sullivan Marc Rose Joseph Hunt Toni Rose Brad Esposito

1. Welcome – Chair Bob Dalley.

Chair Bob Dalley called the meeting to order at 7:40 PM.

2. Meeting Minutes.

A. Approval of the September 9, 2026, PVSSSD Meeting Minutes.

Mark Owens referenced agenda item number 3 in the minutes where Chief Hardy indicated that the dirt in the boneyard is being used to construct the Water and Sediment Control Basin ("WASCOB") and to rebuild the dam. He reported that the WASCOB is being constructed with dirt coming out of the channel and the WASCOB basin itself. No dirt has been removed from the boneyard. Chief Hardy indicated that he relied on the statements made by TJ Green from the U.S. Forest Service.

Chair Dalley indicated that he also suggested changes that were incorporated into the minutes.

Emily Neilson moved to APPROVE the minutes of September 9, 2026, as amended. Allen Cannon seconded the motion. The motion passed with the unanimous consent of the Board.

3. Update on Flooding and Mitigation Efforts - Mark Owens.

Mark Owens reported that the WASCOBs in Pole Creek are 90% complete and the community is seeing how effective the WASCOB on Forsyth has been. He stated that there has been no flooding in the valley and an addition to the project involved building a WASCOB between the McDonald and Hagemeyer residences. It is a much smaller scope but will benefit the entire Spring Mountain Subdivision. He expected the work to take place in the next two weeks. Once the work in the area is complete, crews will move to Site 3 near the new well up behind the Shillander residence.

Assistant Chief, Marc Rose, was concerned about flooding that breaches the road. He asked if enlarging the culverts had been considered. Mark stated that it had not been discussed. Marc stated that the water is flowing better, but it is going into a funnel. He was concerned that, over time, that road will get washed out. The Fire Department's concern is getting a patient out in bad weather. He felt that the culvert and the corridor in general should be looked at. Mark doubted that the road would be washed out because the Emergency Watershed Protection ("EWP") project includes placing rip rap upstream and downstream. The cleanup is part of the Project Plan. Chair Dalley asked that Mark pass along Marc's concerns. It was reported that 6.3 inches of rain fell in the valley over the weekend.

Mark asked that people stay out of the construction zones where rip rap is being stockpiled across from the Lodge. Mark was thanked for his work representing the community.

4. Fire Department Report – Fire Chief, Robert Hardy.

Chief Hardy reported that the numbers were down from the previous month.

5. Clerk and Treasurer's Reports (September) – Rick Peetz and Teri Forbes.

Rick Peetz reported that the main expenses were salaries paid to the Clerk and Treasurer. All expenses were within budget. Year to date, a lot has been paid for lights for the building and for automotive maintenance and repair. He referenced unpaid assessments and the figure to be sent to the County for collection. This year remained similar to last year in terms of uncollected

assessments totaling $11,460. Chair Dalley reported that liens are filed against the properties and collection is turned over to the County.

Emily asked about repair costs to fix a roof leak. Rick stated that funds are available but may have to be transferred in from another category. Chair Dalley noted that one category that is over budget is maintenance, which may require a reallocation.

Chair Dalley acknowledged a $1,000 donation made by Mike Stucki in appreciation of the efforts of the Fire Department in assisting his late wife in her final days. Rick stated that when a donation is received, a thank-you letter is sent from the Fire Department.

Allen Cannon moved to APPROVE the Clerk's Report. Steve Shakespeare seconded the motion. The motion passed with the unanimous consent of the Board.

Teri Forbes reported that the accounts were balanced in order.

Chair Daley reported that he and Allen Cannon meet quarterly with Teri and Rick and review the bank reconciliations.

Steve Shakespeare moved to APPROVE the Treasurer's Report. Allen Cannon seconded the motion. The motion passed with the unanimous consent of the Board.

6. Discussion on Oath of Office – Rick Peetz.

Rick reported that State Constitution Article 4, Section 10 states that all officers elected or appointed must be administered an Oath of Office as follows:

> I do solemnly swear or affirm that I will support, obey, and defend the Constitution of the United States and the Constitution of the State of Utah, and I will discharge the duties of my office with fidelity.

Once the Oath of Office is administered, the signed forms will be kept on file with Records Officer, Steve Shakespeare. Rick will also maintain a copy. Chair Dalley administered the Oath of Office to the Board Members, the Clerk, and the Treasurer. Emily administered the Oath of Office to Chair Dalley.

7. Budget Discussion – Rick Peetz.

Rick referenced the Local District and suggested the fees be reduced to $10 from $20 for a total fee of $260. The Board did not support raising the fee. Rick stated that the current Cost-of-Living Allowance ("COLA") of 3.6% would result in a fee of $259.90, which is in line with the $10 fee.

Rick reported that last year the Board decided not to bill the 13 homes and one lot that were lost in the Forsyth Fire. Of those 13, nine have been permitted and are being built, three are finished and occupied, and five more were anticipated by the billing date. Emily noted that the policy specifies that the fee will be deferred for those property owners until 2030.

Rick reported that fuel and propane costs are not expected to decrease and electricity costs will likely increase. He explained that the power plant that Dixie Power purchases its power from has had some difficulties and costs are increasing. With regard to insurance costs, the insurer has informed Rick that they will not have answers on potential increases until March of 2027. Insurance costs increased this year due to policy additions.

Chair Dalley pointed out that Pine Valley Irrigation has changed its impact fee to $5,000 and increased the transfer fee from $25 to $50. Rick asked if the District should change its rates as well to match.

Rick pointed out that the amount of cash on hand is high. The District's fire trucks are getting older, with $25,000 in costs this year. As of October, there is $113,000 available to purchase equipment and $108,000 in the impact fee account. By the end of the year, he expected to see interest primarily, and for the County to collect at least half of the assessments submitted to them. Operating cash will likely decrease from $117,000 to $62,000 due to year-end and another $20,000 expense. He expected by December 31 to have $293,000. $62,000 will be moved to the Reserve Fund for equipment for a total of $174,000. By next year, he expected to have $325,000 not counting donations, impact fees, or donations.

Emily identified the three criteria for cash on hand as follows:

- May not exceed the greater of 100% of the current year's annual assessment;
- 25% of the total General Fund revenues if the General Fund budget is greater than $100,000; and
- 50% of the total General Fund revenue if the General Fund budget is equal to or less than 100,000.

Chair Dalley was of the opinion that the continuation of the Capital Fund was acceptable as long as there is a plan, and suggested it be revisited as part of the budget. He explained that impact fees are used specifically for growth-related capital.

In response to a question raised, Rick stated that non-returning costs include mainly capital purchases. Chair Dalley pointed out that this month's 2027 Capital Projections include a Brush Truck in the amount of $175,000. Rob Nodine stated that the grant that will be applied for comes out in June of 2027. He noted that the Assistance to Firefighters Grant ("AFG") requires equipment to be new. Steve suggested that they also look at self-funding used equipment, as he had not had much success with AFG grants in the past.

Chair Dalley reported that next month a preliminary hearing related to the budget will be held. The proposed budget will need to be noticed seven days prior to the next meeting.

8. 2027 EMT/Others Incentive Discussion – Steve Shakespeare and Chief Hardy.

Steve Shakespeare referred to the materials provided in the packet. He reported that he and former Fire Chief, Chief Schieffer, worked on finding a way to get more people involved in the Fire Department and committed to training and going on call-outs. The purpose of the incentive is to take the responsibility off of the top handful of people in the department. The When to Work program has been in place for some time, but only a small percentage of members are signing up. He proposed that if adopted, the program only be implemented for six months from January 2027 through June 2027 and then evaluated.

Chief Hardy displayed the When to Work App and showed that very few department members have signed up. He noted that most are Emergency Medical Services ("EMS") calls. The incentive program that was introduced a few years ago was the first step and waived fire assessment fees for Fire Department members. That has worked well, and this is the next step, with a focus on EMS calls and drivers. The logical next step would be to include firefighters.

One of the first goals is to seek better engagement with the When to Work app. Enterprise had a similar struggle with department members not signing up on the When to Work schedule. Once they changed their formula so that department members were guaranteed a certain amount of compensation, regardless of the number of calls they went on, their schedules filled up. He

noted that it costs the City of Enterprise a lot to do that. What is proposed is just a first step.

Another goal deals with certifications and trainings. The intent is to reward those who go beyond the standard of attending 50% of the trainings and 25% of the callouts and are willing to pursue various certifications. Chief Hardy commented that the burden that the department leadership is carrying is unsustainable. He supported whatever can be done to relieve that burden.

Steve mentioned that the number of calls listed is based on last year's numbers and only calls in Pine Valley, which is the intent. Chief Hardy explained that they will respond regardless of the location. It is tricky to use Pine Valley money toward supporting Central and other areas. Emily pointed out that calls in Pine Valley represent a small percentage of the overall calls received. Chief Hardy recognized that it is not a perfect system but considered it to be a logical next step. Emily commented that there is a very small pool of licensed Emergency Medical Technicians ("EMT") in the valley and asked how that will be incentivized. Chief Hardy stated that they hope to increase that pool. Steve stated that not all EMTs are willing to sign up. Drivers will likely be firefighters if they are qualified. Chief Hardy reported that six to eight department members are qualified to drive the ambulance. If someone is signed up on When to Work and arrives by the time the rig is ready to roll out, they have priority seating. If the person signed up is not present when they are ready to go, they lose their seat but have priority if they are signed up on When to Work and arrive on time. It was confirmed that currently a $270 stipend is paid to those who attend 50% of the trainings and go on 25% of the callouts. $599 is paid to those who have advanced training.

Chair Dalley questioned if it is possible to move away from callouts in Central and have Enterprise respond to them. Chief Hardy stated that the residents of Central appreciate our help, and Enterprise needs more manpower along with transporting patients. Stairs and driveways are frequent challenges crews face in Central and Pine Valley. Often, Pine Valley crews arrive first and tag team with Enterprise. Serving in Central is also a good way to keep skills up since EMT skills are perishable. Chair Dalley felt that the Central issue needs to be addressed before any incentive plan is adopted.

Marc commented that when someone calls 911, they do not know whether those responding are volunteers and just want someone to show up and offer help. The goal would be to have two firefighter paramedics in the valley 24/7. Presently, the department is doing its best as volunteers. It was noted that efforts to involve the County have been unsuccessful to date.

Allen expressed his support, and he was in favor of pursuing the incentive option. Budget options were discussed. Chair Hardy's biggest argument against the proposal is that he has a clear conflict of interest since he will benefit the most from the incentive because he goes on more calls than anyone else. It was acknowledged that a large number of calls are to Central. Chief Hardy clarified that Pine Valley does not transport from Central.

Questions were raised about how the incentive will work with Central in the mix. Chair Dalley brought up two philosophies related to compensation, which were to be careful what is incentivized because you will get it and second, that money is not a motivator. The two conflict because for some people, money is not a motivator. He considered the systemic problem to be the number of calls that come from Central. Without them, he felt that more people would be more willing to respond. He was also troubled by the potential to charge for Central calls when they are not paying in. He did not want to have a situation where Pine Valley is subsidizing Central. Emily pointed out that Central is part of the reason Enterprise donated the ambulance. She noted that Pine Valley benefits from servicing Central. Chief Hardy stated that Enterprise is not significantly supporting Pine Valley's role in Central.

Chief Hardy explained that Pine Valley has always assisted in Central because Enterprise has the transport license for the area. Emily asked how things would change if Pine Valley crews did not respond to Central. Rob Nodine and Marc Rose indicated that they do not mind responding in Central. Chief Hardy agreed and stated that they do not take the rescue vehicle, and he knows he'll be home in one hour rather than taking a three-hour ambulance trip to St. George. Marc agreed that the three-hour round trip to St. George contributes a great deal to the burnout factor. All appreciated having an opportunity to help. Toni Rose did not mind responding to calls in Central because if she is signed up on When to Work, she is ready to go at any time.

Marc pointed out that if $9,000 was budgeted for the year, and the program only lasts six months, the cost would only be $4,500. This was thought to be a small step towards finding a solution. The money spent will go to people in the community who are serving their neighbors.

Mark asked what will be cut in the department if $9,000 is budgeted. Rick stated that the budget will remain the same with the cost being an addition. Chief Hardy stated that the cost will come from future apparatus purchases. Individuals who might respond to the incentive were discussed. Chair Dalley commented that the budget is underspent every year and they could reduce what goes into the Capital Fund each year and keep the budget the same. The Board Members were asked to ponder the proposal and be prepared to

address it at the next meeting. The matter could be discussed at the public hearing on the budget at the November meeting. The $9,000 cost was to be included in the Tentative Budget for discussion. The cost would be considered a stipend.

9. Discussion of Website Improvement – Emily Neilson.

Emily presented what she and Joseph Hunt have been working on with regard to the website. Boxes will be added named Community Events, Community Watch, Fire Department, Special Services, and the Overlay Zone. Descriptions will be provided for each category, and documents will be posted within each.

The intent was for notifications on Nextdoor to include a link to the website so that people can explore further. Changes and improvements to be made were described. Joseph asked that comments be sent to him at pinevalleywebsmaster@gmail.com. Emily and Joseph were thanked for their efforts.

Chair Dalley suggested that perhaps Pine Valley Irrigation include a link on the webpage to help improve communication with residents. Dixie Power would do the same.

10. Public Comment. Members of the public may verbally address the Board regarding matters within the jurisdiction of the Pine Valley Local Administration District after being recognized by the presiding Chair. Members of the public participating remotely may participate by notifying the moderator that they wish to speak. Comments are limited to three minutes per speaker. The Board may receive and consider comments but will not take final action on new matters raised during public comment, unless properly noticed on a subsequent agenda.

There was no public comment.

11. Adjournment.

Allen Cannon moved to ADJOURN. The motion passed with the unanimous consent of the Board.

The meeting adjourned at 9:10 PM.

The next PVSSD meeting will be on Wednesday, November 11, 2026.
